

# **Bishops Down Primary School : Maths Week in school 26th to 30th June**

Dear Parents / Guardians,

We are thrilled to be hosting our Maths week again this year, starting on Monday 26th June 2017. During the week the children will be taking part in lots of fun and practical activities that will provide them with new and exciting experiences as well as support them in developing key skills and mathematical thinking.

The activities throughout the week will show how Maths is important across all subjects and the children will have the opportunity to develop their mathematical understanding in Geography, Science, Art, Music and PE. If you would like to come in to talk to your child's class about how you use Maths in your career please contact the class teacher.

## **Maths Safari!**

On Friday 30th June there will be a Maths Safari at 3pm where parents are invited to travel around each class with their child to see how Maths progresses throughout the school. This is a great opportunity to visit your child's next year group to see what they will be learning in September and look at the resources we use to support your child's Maths learning.

Note: Sports Day is on Thursday 29th June and will not be affected by Maths week.

Kind Regards

Simon Wyke

Maths Subject Leader
